WALT: divide numbers and express remainders

I can use remainders and express them as fractions

I can use remainders and express them as fractions and decimals

I can use remainders and express them as fractions and decimals when dividing by 2 digit numbers

## Silver

Convert your remainder as a decimal or fraction.

**Example:**  $1966 \div 3 = 655r1$  or  $655 \frac{1}{3}$  or  $655.3$  (recurring)

1)  $2102 \div 5 =$

2)  $5847 \div 6 =$

3)  $2726 \div 3 =$

4)  $737 \div 2 =$

5)  $4277 \div 5 =$

6)  $4724 \div 7 =$

7)  $4565 \div 9 =$

8)  $3659 \div 4 =$

9)  $1313 \div 5 =$
